

## Cellular, Wireless, and Ethernet on Spruce Point

Regrettably, the Boothbay Harbor Region has for many years not had very good cell phone coverage from AT&T.

Spruce Point Inn management and the town have discussed this situation many times with AT&T to try to improve service for the residents and our summer guest. AT&T has made improvements to coverage areas and signal strength....but, their service is still not acceptable in many areas.

Should you find that your reception is not sufficient for your voice calls, we will be pleased to provide you a complimentary cell phone during your stay.

Complimentary Wi-Fi is available for internet connections from your mobile devices. We also provide complimentary direct Ethernet Internet access using two computers in the card room off the Library in the Main Inn.
